

CAAP Statistics Final Project-3

Hypothesis Testing

Write your name here

Define your hypotheses

- **For each question you found during EDA, convert it to null hypothesis and alternative hypothesis**

Test Your Hypotheses

- **Go through hypotheses testing procedure— not just running R code, but try to explain how the values are calculated as they are. Check the assumptions.**

Discussion on your conclusions

- **Here you can add discussion on your conclusions**
 - **Are they match with your expectation? Double-check if your conclusion is valid**
 - **If the conclusion does not match with your expectation, what would be the reason?**
